# South Jersey Window Tinting

## Let the Sunshine In

The winter of 2008 has so far been one of the warmest ever. While that extra sun shining through your windows may keep away the winter doldrums, it can lead to fading carpets, couches and even artwork. The good news is you don't have to pull the blinds -- all you need is window tinting.

Since 1985, South Jersey Window Tinting has been a leading contractor of window-tinting products, including the complete line of Vista window films, a high-end product with over 25 films to suit just about every purpose. Comprised of a micro-thin layer of polyester and metallized coatings

bonded by adhesives, window films block out 99 percent of harmful UVA and UVB rays, eliminate glare and regulate hot and cold spots in your home. This translates into lower utility bills, which is not only good for the environment, but also for your pocketbook.

One myth about window tinting is that it ruins your view, but it's not the color of the tint that does the work of blocking out glare and heat transfer. Instead, that's accomplished by the material of the film, so there's no need to apply a film with a very dark tint.

All South Jersey Window Tinting products carry a lifetime manufactur-

er's warranty against peeling, cracking, demetallization and delamination. The company also guarantees that when viewed from a distance of four feet, the film will not distort vision and will have a clean and uniform margin.

If you would like to see how the products work, South Jersey Window Tinting will provide a free no-obligation on-site estimate. "We're happy to come into the client's home or business and come up with a personalized solution to their 'sun situation,'" says owner Rob Kemly. "Once they experience the product up close, it's hard for them not to see the difference it can make in everyday living."

South Jersey Window Tinting is located at 14000 Commerce Parkway, Suite H, Mt. Laurel, 800.985.8468 (TINT).  
For more information, visit the company's Web site at [www.sjwindowtinting.com](http://www.sjwindowtinting.com).

Are You Protecting Your Home & Furnishings from the Damaging Effects of the sun this winter?

Free  
Ultraviolet  
Testing
